CSS-> Position property

- 7) static
- 2) Relative
- 3) Ab Solute
- 4) Fixed
- 5) 3KKY
- Ostatic: xIt IT the default position Property

 A we annot Charge its top bottom, left on I

 light positions
- 2) relative: where we can charge it top, bottom,
 left and light position

 * (Its position To relative to its Current

 windows brows sor (viewport
- 3 absolute 3 x heldrin to its Closet Positioned ancestor

 * No gap maintired

 * used for overlapping
- (4) fixedt It TI fixed for the whole window
- B) Sticky; ATA To also dixed but only upto
 Its parent

 so use have to mention the position from where
 it should be stricky

 ext ing of position: stricky.

 top: 400pm;
